Objective

To create value for the business & the organization by making the most of my "think twice code once" attitude, key competencies, my in-depth understanding of data structures & experience in the field of Business Analytics and Software Development.

Skills

Programming Languages:

Python, JavaScript ES5/ES6, Typescript, Swift3, HTML5, CSS3, Java, C, C++

Back End Frameworks:

Django, Node.JS, Flask & Express.JS

Front End Frameworks:

React, Redux, Blueprint.JS, AngularJS (v1.x), UI-Kit (iOS), JQuery, AJAX, Bootstrap, Materialize, D3.JS

Database:

MongoDB, Mongoose, Firebase, SQL, SQLite, MySQL, NoSQL, MAMP, Core-Data (iOS),

Platform/Miscellaneous:

GIT, Atom, Web-Storm, OSX, X-Code, Eclipse, NetBeans

Projects

BMN Inventory:

Manage your inventory with our Web Application.
Built with Node.JS, Express.JS, AngularJS, MongoDB

BMN Inventory iOS:

Manage your inventory using your fingertips an addition to my BMN Web Application.
Built with Swift 3, UI-Kit

The Wall:

Do not hesitate to share your thoughts amongst community
Built with Python Flask, MySQL

Book Manager:

Manage and post reviews on your favorite book
Built with Python Django, SQLite

Experience

Full Stack Web Developer Mentu Inc., Menlo Park, CA

Aug'17 – Present

- Mentu is an Education Startup mentoring students of US & Foreign Nationals for English Language Proficiency.
- My major responsibilities include development of Mentu's Web Platform.
- Tech Stack: Django(Backend), React/Redux(Frontend), PostgreSQL(Database), Typescript, SASS.

Full Stack Web & iOS Developer Coding Dojo, San Jose, CA

Dec'16 – Apr'17

- At Immersive **Full Stack Web & iOS Development Bootcamp** I turbo boosted my skills by getting hands on practice on production level projects and web application frameworks
- Learned **Python Stack** with Django & Flask frameworks with SQLite & MySQL. Built real-time wall application where user can post and other users can comment
- Learned **MEAN Stack** with backend server talking with multiple clients. Built Inventory Management App with RESTful Routes
- Learned **iOS App Development** using Swift 3 for Apple iPhones. Extended Inventory Application by adding iOS app as secondary mobile client

Business Analyst Intern at Financial Attunement Inc., San Francisco, CA

Mar'16 – Dec'16

- Utilized my key skills & competencies for actualization of the firm's goals. Conducting IT research, analyzing problems related to technology, developing and implementing effective solutions
- Supervising the efficient management of real time systems & providing reliable technical support to clients
- Establishing new systems for new projects and properties, ensuring management of leasing database

Web/Software Developer at Yogi Comp, Mumbai, India

Feb'13 – Dec'14

- Actively utilized my time in evolving in the field of development. Persistently assimilated knowledge of new technologies and developing APIs
- Developed a Java based internet banking app with improved login security measure
- Used Image Encryption technique to authorize user as a secondary login after traditional login

Education
