Work Experience

Intern

Financial Attunement Inc.

2016 – Present
San Francisco, CA

As a Business Analyst intern I utilize my key skills and competencies for actualization of the firm's goals. Conducting IT research, analyzing technology related problems, developing and implementing effective solutions.

- Supervising the efficient management of real time systems and resolve issues in our pre-installed systems.
- Providing reliable technical support to clients so as to prevent lapses and ensure an astounding work.
- Chairing the establishment of new systems for new projects and properties. Some of these systems are basic setups and Cloud PBX.
- Ensuring the proper management of leasing database for new and current rental applicants and tenants for multiple properties across US.

Web/Software Developer

Yogi Comp

2013 – 2014
Mumbai, India

- Executed a Java and HTML/CSS based project on advanced security mechanism for Internet banking client, which improved their security measures by 15%.
- Conducted a platform based end-to-end testing for three clients and debugged 65% of the issues in current releases while improving the overall product quality by 25%.
- Implemented an Inventory Management Software, which is currently being used by 30+ clients that helps them in end-to-end management of their inventory goods automating manual processes by 40%.
