## Work Experience

### Full Stack Web Developer Trainee

Dec'16 – Present

#### Coding Dojo

San Jose, CA

- As a Trainee at Immersive Full Stack Web Development Bootcamp I boosted my skills after getting hands on practice on production level project.
- Learned Python Stack with Django & Flask frameworks with SQLite & MySQL.
  - Built real-time wall application where user can post and other user can comment
- Learned MEAN Stack with backend server talking with multiple clients.
  - Built Inventory Management App with RESTful Routes.
- Learned iOS App Development an addition to Node JS Backend.
  - Extended Inventory App by adding iOS app as secondary client.

### Intern

Mar'16 – Dec'16

#### Financial Attunement Inc.

San Francisco, CA

As a Business Analyst intern I utilize my key skills and competencies for actualization of the firm's goals. Conducting IT research, analyzing technology related problems, developing and implementing effective solutions.

- Supervising the efficient management of real time systems and resolve issues in our pre-installed systems.
- Providing reliable technical support to clients so as to prevent lapses and ensure an astounding work.
- Chairing the establishment of new systems for new projects and properties. Some of these systems are basic setups and Cloud PBX.
- Ensuring the proper management of leasing database for new and current rental applicants and tenants for multiple properties across US.
